

Eco Code

Please try to follow these eco friendly guidelines suggested by students of South Wilts 2014.

Conserving heat

- 🔥 Conserve heat in buildings by closing doors
- 🔥 **Ask teachers to** turn off radiators if it's too hot rather than opening windows
- 🔥 **Close windows at the end of the day**

Saving energy

- ☀️ Use natural light in class rooms by opening blinds
- ☀️ Turn off computer monitors if they are not being used
- ☀️ **Always preview rather than print**
- ☀️ Switch off lights if rooms are empty or if you are last to leave a room **or at the end of the school day**

Conserving water

- 💧 Turn off taps
- 💧 Drink from the water fountains instead of buying bottled water

Saving resources

- 🌳 Save paper as much as you can – print and write on both sides of paper
- 🌳 Use fewer paper towels
- 🌳 Use plates instead of takeout trays in the canteen

Recycling

- ♻️ Re-use paper as scrap paper
- ♻️ Recycle all paper, card, plastic and metal by using the green recycling bins

Transport

- 🚲 Use public transport or walk and cycle to school if possible
- 🚲 Car share whenever you can

Take pride in our surroundings, respect wildlife and keep the community clean and tidy by using the correct bins!

Additional notes

- School to buy magnets to keep doors open
- Consider getting cups back into the canteen
- Labelling taps to show if they are drinking water or not
- Install water fountains in the changing rooms
- Research hand dryers
- Use scrap paper drawers
- Positive notices about cycling and recycling
- Form tutors to go through Eco code at the start of the year
- Display eco board on the display board.
